

IGNITION WIRE SETS

Original Equipment Quality (ISO/TS 16949 Compliant)

- More than **1200** applications

- Available in

- **Premium Line** (ISO3808 / ISO6856)

- **Standard Line** (ISO3808 / ISO6856)

- **Regular Line**

- All wires are made in **USA**

About Protec Group

Protec Group of companies are involved in the manufacturing and distribution of Original Equipment (OE), Replacement (RE) and High Performance automotive parts.

The main items manufactured and distributed are Ignition Wire components, Ignition Wire Sets, Ignition Coils, Racing Seats and Washable Air Filters.

Trade-names that Protec uses are Protec, Vortec and Sportrac.

A history of COMMITMENT

Protec Group is an independent private concern with a history of total commitment to the automotive business. Having accumulated experience in this field since 1997, the management founded Protec in 2002 as an umbrella for several companies, each of them serving a specific group of customers. The family-business-character and independence of the company implies strong personal involvement by its management and very short lines of communication. This facilities fast decision-making, with respect to both customers and suppliers.

International FOCUS

Because the marketing and distribution of automotive components has already been its core business for several years, Protec knows its way around.

It distributes high quality products to a great number of automotive part importer and whole-salers throughout 42 countries around the world.

Our VISIONS & MISSIONS

Protec Group Vision is to be the most effective and efficient ignition wire component and ignition wire sets supplier for both the OE and RE market globally.

To manufacture high quality products

To utilize co-operative global technical resources to ensure product competitiveness

To be committed to total customer and employee satisfaction that will ensure continual growth and to meet stakeholders expectation

Laboratory EQUIPMENTS

Protec operates one of the most complete and modern rubber and ignition wire laboratory in the region. The equipments allow Protec to test ignition wires and wire components to meet the complete requirements of SAEJ2032, ISO3808 and ISO6856 standards.

Few laboratories in the region have the equipment to test these requirements as ignition wires and wire components are specialized product.

This allows Protec to fully understand the materials and components which goes into the production of an ignition wire. We at Protec believe in order to make high quality ignition wire sets and components. We must have in-depth understanding of product.

PHOTOS: KYLE IZMANY

The Professional Technologies in Racing

Protec also maintains association with Government agencies and various research and development bodies such as Rubber Research Institute (Malaysia), MATRADE (Malaysia), ARTC (Taiwan), AAIA (America), SEMA (America) to ensure constant upgrading and competitiveness of its products.

WHEN YOU THINK
ABOUT WHAT
GOES INTO A
PRODUCT, IT IS
IMPORTANT TO
REMEMBER WHO
IS BEHIND IT .

International Branding Strategy

PROTEC directly markets and distributes the "Protec" brand name for ignition wires and components globally.

Quality Product and Professional R & D

From material to production to QC, We ensure every step are well taken off, therefore only quality product is made. Moreover, we have strong marketing and research team to face and overcome the uncertain market demands and competitions.

Clear Market Target

At Protec, we believe in making quality products available at competitive price.
